Let's Start!

Food can keep us healthy!

Learning Outcome

Describe emotions and feelings in present and past situations in spoken or written texts and in work and social contexts.

Ask your partner:

- Which do you think is more effective, natural remedies or man-made medicines? Why?
- What ingredients do you add to foods to make them healthier?

Can Do Statements

- I can talk about beliefs, opinions, and people's personalities and can use colloquial expressions.
- I can talk about reasons and results of an action or an event.
- I can report other people's words and thoughts.

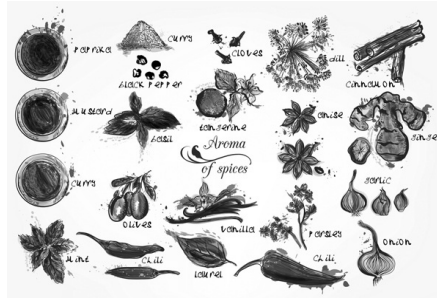

Let's Explore!

Vanessa thinks there are **too many cooks in the kitchen***

* "Too many cooks in the kitchen" means that there are too many people trying to control a project, with negative consequences.

Instructions: Read the text aloud.

- Amy:** Wow, that vegetable broth soup turned out really well! I told you that it wouldn't be boring.
- Peter:** Yes, you convinced me that it would be scrumptious, and you were right.
- Vanessa:** Since we added all that extra spice, it has a lot of zesty flavor. I often find that vegetarian dishes need a few more spices and herbs than the recipe calls for. I usually double the amount of spice because vegetarian recipes are often quite bland. You can just keep adding spice and tasting the food until it's exactly the way you want it.
- Amy:** My doctor informed me that certain spices are very good for your health. What do you know about that, Vanessa?
- Vanessa:** It's true. Since cinnamon helps to process sugar, it keeps your blood sugar level low. Ginger reduces inflammation and arthritis pain. Some people think that it also fights cancer.
- Peter:** Really? I had no idea that food could make you healthier. I just thought I became unhealthier because of my eating unhealthy food.
- Vanessa:** Yes, spices and herbs have been valued for centuries as they can treat and prevent illness. Before modern medicines were developed, people relied on these natural sources. Chili pepper lowers cholesterol and turmeric also reduces inflammation pain.
- Amy:** My friend convinced me that there are herbs and spices that can help with depression and mood swings too. He assured me that he feels so much more energetic and positive when he includes certain foods in his diet.
- Peter:** That's amazing! So, what can we make that has all these ingredients in it? Let's make a super-healthy cure-all! Vanessa, you can chop up and prepare the ingredients and Amy can cook and stir and I'll add the spices and herbs!
- Vanessa:** Hold on there, Peter. Have you heard the expression, "There are too many cooks in the kitchen"? It's a recipe for disaster!

Let's Practice!

Peter and Amy listen to Vanessa talk about spices!

Instructions: Choose the option that best completes each sentence.

1. It's super healthy and supposed to be a ...
 - a. cures all.
 - b. cure-all.
 - c. care-all.
2. Too many people in the kitchen adding spices is ...
 - a. a receipt for disaster.
 - b. a disastrous recipe.
 - c. a recipe for disaster.
3. Ginger is good for ...
 - a. information.
 - b. inflammation.
 - c. inflamories.
4. She always adds more spices than what ...
 - a. it is calling.
 - b. the callers for.
 - c. it calls for.
5. She told them that chili pepper helps in ...
 - a. keeping cholesterol low.
 - b. has low cholesterol.
 - c. lowers than cholesterol.

Let's Practice!

Too many cooks!

Instructions: Circle the correct word to complete the sentence correctly. Read the sentences aloud. Check your pronunciation with your instructor.

1. **Since / Because** we added all that extra spice, it has a lot of flavor.
2. I usually double the amount of spice **but / because** milk recipes are often quite bland.
3. Yes, spices and herbs have has valued for centuries **as / however** they can treat and prevent illness.
4. I just thought I became unhealthier **because / since** of my cooking unhealthy food.
5. I didn't got anything extra **since / because** I don't like spicy food.

Extension Activity

Research a spice or an herb.

Instructions: Complete the following steps. Fill in the Self-Assessment.

- With a partner, make a list of herbs, spices or other foods that have a therapeutic (medical) benefit.
- Choose one spice and research it on the Internet.
- Make notes on all the uses for the spice.
- Create a poster with information about your spice.
- Present your poster and information to your group.

Self-Assessment

Yes

No

I make a list of therapeutic herbs and spices.

☐ ☐

I research the uses of a spice on the Internet.

☐ ☐

I make notes on what I learn about the spice.

☐ ☐

I create a poster with information about the spice.

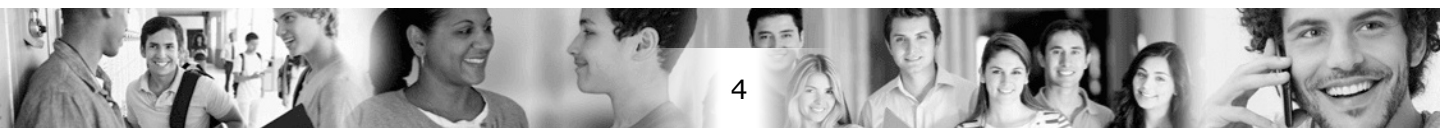

☐ ☐

I present the information to a group.

☐ ☐

Target Words

- to call for** (verb): to ask for or require
e.g. I often find that vegetarian dishes need a few more spices and herbs than the recipe calls for.
- to convince** (verb): to cause someone to believe something or to do something
e.g. My friend convinced me that there are herbs and spices that can help with depression and mood swings too.
- to assure** (verb): to promise; to give confidence to
e.g. He assured me that he feels so much more energetic and positive when he includes certain foods in his diet.
- mood swing** (expression): an abrupt and apparently unaccountable change of mood
e.g. Mood swings can be caused by a poor diet.
- inflammation** (noun): a condition where part of the body becomes reddened, swollen, hot, and often painful
e.g. Ginger reduces inflammation and arthritis pain.
- cholesterol** (noun): a fatty substance that is found in the body tissue and blood of all animals
e.g. Chili pepper lowers cholesterol and turmeric also reduces inflammation pain.
- cure-all** (noun): a medicine or other remedy that will supposedly cure any ailment
e.g. Let's make a super-healthy cure-all!
- a recipe for disaster** (expression): something which is likely to cause trouble or serious problems
e.g. It's a recipe for disaster!

Learning Points

Reason- Result: Because and Since

You can use **because**, **since** or **as** to talk about the reason and the result of something in one sentence. The result of something is the consequence and the reason is the cause.

In speaking and writing, there are many times when you will need to give reasons for something. You might also have to provide the causes.

Let's look at how to use different connectives to answer the question: "Why did this happen and what was the result?"

because

- this is the most commonly used connective
- the result is given first and then the cause
- **because** can also be used when the reason comes before the consequence
- the structure that follows is subject-verb-object
- you could also use **as** or **since** in this way

*Elena called the plumber **because** there was a leak under the kitchen sink.*

*Elena called the plumber **since** there was a leak under the kitchen sink.*

*Elena called the plumber **as** there was a leak under the kitchen sink.*

("Elena called the plumber." is the result. "There was a leak under the kitchen sink." is the cause.)

since

- when the cause comes first, followed by the result
- the structure that follows is subject-verb-object
- a comma is placed between the since clause and the main clause.

***Since** the plumber couldn't come, Elena tried to fix the leak herself.*

("The plumber couldn't come." is the cause that led to the result "Elena tried to fix the leak herself.")

because of + a noun

because of + verb-ing (a possessive usually comes before the verb-ing here)

- these structures introduce the reason

*Unfortunately, the leak got worse **because of** her lack of plumbing experience.*

*Unfortunately, the leak got worse **because of** her trying to fix it without the proper tools.*

("Her lack of plumbing experience" and "her trying to fix it" are the reasons why "the leak got worse".)

Remember that all of these result clauses are dependent and cannot stand as sentences on their own.

Learning Points

Examples:

- *Since we added all that extra spice, it has a lot of zesty flavor.*
- *I usually double the amount of spice because vegetarian recipes are often quite bland.*
- *Since cinnamon helps to process sugar, it keeps your blood sugar level low.*
- *I just thought I became unhealthier because of my eating unhealthy food.*
- *Spices and herbs have been valued for centuries as they can treat and prevent illness.*

Reporting Statements

You can say in your own words what someone else has said. There are several different reporting verbs that can help you to do this.

You can use a *that*-clause after most reporting verbs.

Example:

*The man **agreed that** watching television was one of the best ways to relax.*

After some verbs, it is necessary to put an object before the *that*-clause.

Some of these verbs include: **inform, notify, convince, tell, assure, remind, reassure** and **persuade**.

Examples:

*Luke **informed his sister that** their parents would be home late.*

*Hans **notified his boss that** he had to leave work because of a family emergency.*

*I **told Leia that** everything was going to be okay.*

*For some other verbs like **promise, teach, show, warn** and **advise**, it is not always necessary to put an object after the reporting verb.*

Example:

*I overheard Luke talking with his sister. Luke **promised (his sister) that** he would pick her up after school.*

Examples:

- *I told you that it wouldn't be boring.*
- *You convinced me that it would be scrumptious, and you were right.*
- *My doctor informed me that certain spices are very good for your health.*
- *My friend convinced me that there are herbs and spices that can help with depression and mood swings too.*
- *He assured me that he feels so much more energetic and positive when he includes certain foods in his diet.*
